Professor Rosa Alati*(Head of School of Population Health at Curtin University, Western Australia)*

Professor Rosa Alati is an internationally recognised researcher in epidemiology of health and mental health and Head of School of Population Health at Curtin University, Western Australia. In the last twenty years, she has worked collaboratively with national and international teams to progress the study of maternal and offspring outcomes and related aspects of developmental and life course research, particularly in relation to Public Health and well-being. Since her seminal paper on the effects of maternal light alcohol use in pregnancy and alcohol disorders in offspring published in the Archives of General Psychiatry, she has incrementally contributed to the evidence base linking early life exposures with offspring’s mental health and wellbeing. Her research has been instrumental in identifying and informing Public Health policy formulation and interventions to reduce Public Health problems. She is a member of expert panels whose determinations translate directly into changing government protocols and practice.
